Re: State Depository Program

This Month's Shipment

This shipment includes State Documents received in August and September, 2004.

Idaho Commercial Driver's License Manual. We claimed the 2003 edition of this Idaho Transportation Department publication. The manual was published but copies are no longer available. We were also informed that the content was identical to the 2002 edition with only the cover being updated.

Idaho Medicaid Behavioral Risk Factor Survey. We distributed the most recent edition of this Department of Health and Welfare report last spring. That report covered 2001 and was published in March 2004. The agency informed us that a report covering 2000 was never completed.

Speakers Bureau. We claimed the 2004 edition of this Boise State University publication. We were informed that it was not published in the fall as expected but that it should be completed "in the near future".

Idaho Council on Developmental Disabilities:

Annual Report 2003 is included in the shipment. We will claim the 2001 and 2002 editions.

The Winter 2004, Special Edition and the Spring 2004 (vol. 16, issue 2) issues of Visions & Values are also included in the shipment. The Special Edition is not numbered but represents vol. 16, no.1.

Idaho Department of Commerce and Labor publications:

The December 2003, July 2004, and August 2004 issues of Labor Force by County are included in the shipment. We claimed the January 2004 issue from the Department of Labor and were informed that it was not published. Beginning with the June 2004 issue, this report reflects the new name of its publisher, Idaho Department of Commerce and Labor.

The second edition of the Rural Community Block Grant Application Handbook was also published under the new combined agency name. This edition was published in 2004 but a previous edition was published in 2001. We claimed the earlier edition and will distribute it with the January 2005 materials.

The July and August 2004 issues of Idaho Employment are included in the shipment. This title began publication under the new combined agency name beginning with the June 2004 issue.

A few of you received copies of four titles published by the Department of Commerce under a one year grant lasting from 2001 to 2002. The grant program was titled the Idaho State Planning Grant and the publications are: Idahoans Without Health Insurance: A Data Report, Idahoans Without Health Insurance: A Strategic Summary Report, Idahoans Without Health Insurance: A Strategic Report, and Idahoans Without Health Insurance: The Economic Impact on Business, Health and Community.

The Occupational Employment and Wage Survey for 2004 was also published under the Department of Commerce. We claimed the 2003 edition and were informed that it was not published. The agency chose to incorporate the data for 2003 into the most recent report. Please see the introduction in the 2004 report for details.

Please watch for similar changes on titles published by this merged agency as we will not report all of them and the change may not be carried out consistently before and after June 2004.

Idaho Geological Survey, University of Idaho:

Rocks & Potholes of the Big Wood River is number 54 in the University of Idaho, Idaho Geological Survey, Information Circular Series. This and a few copies of numbers 40 through 43 of the GeoNote series are included in this shipment.

We were not previously provided with distribution copies of issues in these or the Survey's many other series. We will distribute any copies we receive but will not fill claims for previous issues as many are either out of print or no longer available.

Idaho Kids Count:

We received the first two installments in a new information series authored by Idaho Kids Count. A Closer Look At Idaho's Kids and Policy Brief: A Public Health Priority: Teen Suicide in Idaho are included in the shipment.

This program was previously funded in part by the Department of Health and Welfare but is now sponsored by Mountain States Group, Inc.. We will retain these titles for our collection but cannot claim publications from this agency as they are a non-profit group that does not receive state funding.

Institute of Rural Health, Idaho State University:

We received four information sheets from this program titled: Institute of Rural Health, Idaho Real Choices Project, Idaho Rural Health Association, and Idaho Traumatic Brain Injury Project. For more detailed information about these projects and the Rural Health research program, visit the Institute's website at: <http://www.isu.edu/departments/irh/> .
